Hiring Manager  
13 Mapanza Road, Town Center  
P. Ndola, Zambia.

Dear Sir/Madam,

**REF: APPLICATION FOR WEB/SOFTWARE DEVELOPER**

I'm excited to be applying for the Web/Software developer position at MEIT TECHNOLOGIES. As someone who is highly focused and attentive to detail, I thrive on building quality systems that surpass end users' expectations.

During my study at Mulungushi, I developed a lot of innovative solutions across a variety of software platforms. I am keen in sharing my knowledge, in 2020 I spearheaded a version control training for 3<sup>rd</sup> and 2<sup>nd</sup> year students whilst my study at University.

Recently, i was part of the joint COVID-19 contact tracing research project for the Ministry of Health undertaken by three Universities namely; Mulungushi University, Copperbelt University and NIPA, the research was funded by NTSC. My role was to data-mine the information gathered by the mobile app and present visualization of the data on the dashboard using python and data mining techniques. I am attentive to the need for continued process improvements. I have developed a range of personal software in various technologies and platform which can be accessed through my [Github](#) portfolio.

Thank you for your time and consideration. I'm looking forward to learning more details about the open position. I'm excited about the opportunity to leverage my unique range of skills, and I'm eager to demonstrate my commitment to developing world-class software solutions for MEIT TECHNOLOGIES.

Sincerely,  
Paul Kunda.
